The Delaware Riverkeeper Network presents *Our Water, Our Air, Our Communities – and Forced Gas Drilling?*, an Act 13 Forum at WHYY Studios

Bristol, PA – Delaware Riverkeeper Network hosts a forum with the lead litigators and litigants of the landmark Act 13 case – the case in which a majority of the conservative Pennsylvania Supreme Court declared that the rights of pure water, clean air, and a healthy environment, across the generations, must be protected by state and local legislators.

The forum will be held on Thursday, March 13 at 6:30 pm at WHYY Studios in Philadelphia and will include a discussion of how Act 13 came to be passed, how and why the legal challenge was formulated, including the interesting alliance between the seven municipalities and the Delaware Riverkeeper Network, and the implications for environmental, municipal, and legislative decision making going forward.

You are invited to join the actual participants who made the case happen and secured the big legal success, submit your questions at the studio or online, and take part in a stimulating evening that will help interpret this watershed moment in Pennsylvania history. All participants have the opportunity to attend the event in person or view as a live webcast.
