1. Source: 40 CFR 81 Subpart C
2. Unclassifiable areas cannot be classified based on available information as meeting or not meeting the national ambient air quality standard (NAAQA) for the pollutant.
3. Ozone nonattainment classifications reflect 2008 8-hr Ozone NAAQS. PM_{2.5} non-attainment designation is noted as either annual or 24-hr if only one of the PM_{2.5} NAAQS is considered non-attainment.
4. Designations by County are listed under the AQCR for areas that have AQCR designations in addition to county designations.
5. Loops include all associated facilities listed in Table 1.2.-3 of Resource Report 1 (i.e. pig receiver assemblies, crossover piping and mainline valves; as applicable to each loop).
6. Only portions of Indiana County, OH are non-attainment for the PM_{2.5} 24-hr NAAQS, those areas include Townships of West Wheatfield, Center, East Wheatfield, and Armagh Borough and Homer City Borough. The Armagh Compressor Station falls within the Johnstown, PA PM_{2.5} non-attainment area.
7. Only portions of Berks County are designated non-attainment for Pb; Lyons, PA area is bounded by Kutztown Borough, Lyons Borough, Maxatawny Township, and Richmond Township; North Reading, PA area is bounded by Alsace Township, Laureldale Borough, and Muhlenberg Township. The Bernville Loop is north of the North Reading Area and south of the Lyons Area.
8. Only Monongahela Township in Greene County is in non-attainment of the NAAQS for PM_{2.5} (annual and 24-hour).
